## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to compositions for cleaning optical elements, classified in class 510, subclass 163.
  - II. Claims 7-10, drawn to method of making a single fluoride crystal from a molten state, classified in class 117, subclass 73.
  - III. Claims 11-14, drawn to compositions and methods of etching a metal fluoride crystal, classified in class 252, subclass 79.3.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. Although each of the claimed groups are used in the same process, each of the claimed inventions are directed to wholly distinct aspects of this process. For example, the cleaning composition and the method of cleaning a crystal are wholly distinct from the formation of the crystal itself.
- 3. The current examiner is most familiar with the compositions and methods of cleaning. Should the applicant decide to elect group II, the case will probably be transferred. Should the applicant choose group 1, it may be possible, upon finding an allowable composition, to rejoin

Application/Control Number: 10/664,484

Art Unit: 1751

the methods of using such allowable compositions for the purpose of cleaning/etching the crystal.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory E. Webb whose telephone number is 571-272-1325. The examiner can normally be reached on 9:00-17:30 (m-f).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on 571-272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
